

Q. 4 What is DFD?

Create a DFD on FIPKart.

Ans:- A data flow diagram shows the way information flows through a process or system. It includes data inputs and outputs, data stores and the various sub processes the data moves through. DFDs are built using standardized symbols and notation to describe various entities and their relationships. It uses defined symbols like rectangles, circles as arrows, plus short text labels, to show data inputs, outputs, storage points and the routes between each destination.
